

Spring Tool Suit Generate JPA Entity from Database : Solution

Asked 3 years, 10 months ago Modified 3 years, 10 months ago Viewed 9k times

G9 plugin from Marketplace in Spring Tool Suit or Eclipse did job done.

8

1. Install Plugin G9

2. Select Project (JAVA)

3. Import "Import Database Model"

4

4. Select JDBC Driver (In my case mysql)

5. Maintain JDBC Connection

- New
- Provide *Driver Name, Add Jar, Port, Driver Class and connection url along with schema (jdbc:mysql://localhost:3306/{schema_name})*

6. Close JDBC Connection Box

7. Port, DB Name, User Name and PWD

8. Fetch
